Safe & secure with managed hosting

Quotation Hosting TSG
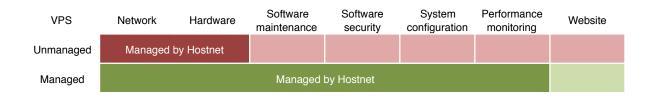

Hosting Solution

This estimate is based on a Managed Virtual Private Server which will host all of the TSG websites. We do not know the total amount of visitors yet which makes it difficult to forecast the network data usage. Based on our experience we think a VPS 2GB with a Managed Service Level Agreement (SLA) fits the needs of TSG.

Our supplier of hosting services is Hostnet. Hostnet's datacenters are located close to the AMS-IX internet exchange point. "Managed" hosting means thats Hostnet is responsible for the network, hardware, software maintenance, software security, system configuration and performance monitoring where usually the hosting provider is only responsible for network and hardware.

More info: https://www.hostnet.nl/documenten/SLA-VPS-managed.pdf

Managed vs Unmanaged

VPS	Network	Hardware	Software maintenance	Software security	System configuration	Performance monitoring	Website
Unmanaged	Managed by Hostnet						
Managed	Managed by Hostnet						

We (the web agency) will only be responsible for the website and performing offsite backups of the website.

With the Managed Service Level Agreement (SLA) Hostnet guarantees accessibility and technical maintenance of the server, Hostnet performs software- and security updates and Hostnet monitors all the services 24x7. Should there be a malfunction we report this directly to Hostnet. They guarantee a resolution time of 4 hours.

The VPS will be delivered with the following software:
- CentOS 7 (64 bits)
- Plesk 17 (Web Host)
- Apache 2.4
- MariaDB 5.5
- PHP 7.1
- Memcached en PHP modules
- SpamExperts outgoing mail filtering

The services will be protected by a firewall. This means the server is only accessible from certain IP addresses.

Overview of the delivered services

VPS 4GB Managed
- 2 GB RAM-memory
- 2 processors
- 100 GB disk space
- 2000 GB data traffic
- Plesk 17 Web Host Edition
- HardenedPHP
- SpamExperts outgoing mail filter

Service Level Agreement – Managed 24x7/4
Hostnet is fully responsible for the technical maintenance of your Managed VPS. Your server is being monitored day and night and malfunctions will be fixed within 4 hours.

The investment

Below you'll find an overview of the costs. This is without the costs of, for example, illustrations and / or photography. We do offer this.

Activities	Amount	
VPS 2GB Managed (incl. Plesk licentie and HardenedPHP)	€ 136,50	
		+
TOTAL excl. VAT (per month)	**€ 136,50**	

Terms and Conditions

The general conditions of BNO (graphic design) apply to this budget. These can be found on our website.
