Driving Performance Across Every Area of the Site

From wash to branding, integrated solutions that deliver measurable impact

Delivered by TSG Technics, our integrated solutions bring together vehicle wash systems, signage, lighting, branding and maintenance to support forecourts, retail sites and commercial environments.

By combining these services into a single, integrated offer, we simplify project delivery, improve consistency across sites and ensure every element performs as it should. From concept through to ongoing support, our expertise helps operators create safe, efficient and visually impactful environments that drive customer engagement and revenue.

Forecourts are evolving into multifunctional destinations, and this transformation demands a more joined-up approach. TSG Technics enables this shift by aligning core infrastructure with customer-facing elements, ensuring every aspect of the site works together seamlessly.

Our approach simplifies complexity. By integrating multiple technical disciplines under one roof, we reduce project risk, accelerate delivery and ensure compliance with stringent health and safety standards. Every solution is tailored to site requirements, helping operators maintain operational continuity and protect brand reputation.

Why choose TSG Technics?

- Complete design, installation and maintenance capability
- Expertise across multiple technical disciplines
- Tailored solutions for forecourts, fleets and commercial sites
- National coverage with rapid response
- Care & Protect packages to safeguard assets and brand image

Signage and Branding

Because image counts

Signage is the silent salesman of every forecourt. It influences perception, guides behaviour and reinforces brand identity. Clean, well-designed signage conveys professionalism and builds trust, while neglected signs can undermine credibility.

Branding is more than a logo. It is the visual language that connects with customers and differentiates your business from competitors. When combined with strategic lighting and wayfinding, signage creates a welcoming environment that encourages dwell time and repeat visits.

Types of signage

- **Branding:** Elevates perception and reinforces identity
- **Promotional:** Drives impulse purchases and highlights offers
- **Directional:** Improves wayfinding and customer flow
- **Regulatory:** Ensures safety and compliance

TSG provides a comprehensive signage service, comprising design, manufacture, installation and aftercare. Our experts deliver creative solutions that make a lasting impact, supported by Care & Protect packages to keep signs clean and vibrant.

Examples of signage solutions:

- Built-up letter signs
- Illuminated canopies
- Totem poles
- Fascia and vinyl applications

Kärcher Vehicle Wash Solutions More than just a car wash

TSG works exclusively with Kärcher to deliver professional cleaning systems for cars, vans, buses and heavy goods vehicles. Kärcher's advanced engineering and long-standing reputation for reliability help us provide solutions that enhance the customer experience and improve site performance. Many systems also offer the ability to reclaim up to 90 percent of water, supporting lower operating costs and more sustainable day-to-day operation.

System Options

CW 1 Klean!Fit: A straightforward and durable wash system designed for businesses that manage their own vehicles and do not require on-site payment. CW 1 delivers dependable performance with a focus on productivity. It offers a simple set of features that work hard without unnecessary complexity, making it ideal for car dealers, rental fleets and service centres.

CW 3 Klean!Star: A fast and efficient gantry wash designed for high-volume forecourts. CW 3 combines premium build quality with customisable wash options and a built-in water-saving function for resource-conscious sites. It supports busy operators by improving throughput and delivering clean, consistent results, wash after wash.

CW 5 Klean!Star iQ: A high-performance gantry wash created for sites that want to stand out. CW 5 pairs advanced technology with precise wash control to deliver striking results and an impressive customer experience. Its energy-efficient design and water-saving features support sustainable operation without compromising performance.

Jet Wash SB OB: A flexible single-bay jet wash for sites that need professional cleaning power in a compact space. SB OB provides a complete wash with configurable settings, efficient resource use and low investment costs. Its small footprint makes it an ideal choice for operators who want strong performance without sacrificing valuable forecourt space.

SB MB and SB MU Self-Service Wash Systems.

Robust self-service wash systems built around proven high-pressure technology for reliable operation. These units deliver strong cleaning performance and efficient energy use, reducing running costs. Customers benefit from simple controls and effective wash tools that support a thorough, satisfying clean.

SB V K!Vac: A powerful self-service vacuum designed for constant suction and easy on-site maintenance. It supports all major payment options, including contactless, mobile and card. Operators can add an air gun for precise interior dust removal, along with optional LED lighting, delivering an enhanced and more enjoyable cleaning experience.

Fleet Wash Solutions

Keeping the wheels turning

For haulage and passenger transport operators, cleanliness is more than cosmetic: it protects assets, ensures compliance and upholds brand reputation. TSG delivers heavy-duty wash systems for HGVs, buses and coaches, designed for speed, efficiency and sustainability.

Kärcher TB Range: TB36, TB42, TB46, TB50

A heavy-duty commercial gantry wash for lorries and buses, available in multiple height options from 3.4m to 5m. The modular design adapts easily to different sites while delivering reliable performance and strong cleaning results with minimal maintenance. High-pressure spinners and a galvanised steel frame ensure long service life, making the system ideal for fleet operators and transport depots.

- Automatic exterior cleaning for large vehicles
- 3-brush gantry with washing height from 3.4m to 5.05m
- Designed for high throughput with reduced downtime

RBS Mobile Single-Brush Wash

A mobile wash unit for efficient cleaning of vans and buses, designed to follow the vehicle's contours for a consistent finish. The rotating brush removes dirt quickly and requires little effort from the operator. A precise dosing pump helps reduce chemical use and operating costs while supporting more sustainable cleaning.

Why invest in depot wash facilities?

- Reduce corrosion and extend vehicle lifespan
- Maintain health and safety standards
- Improve fleet image and customer confidence
- Save time and money compared to off-site or manual washing

Service and Maintenance

A proactive maintenance strategy is vital for efficient, profitable wash operations. TSG offers bespoke Planned Preventative Maintenance (PPM) packages to keep equipment in peak condition and reduce downtime. Reactive repairs are more expensive in both time and money. PPM acts as an insurance policy, ensuring continuity, safeguarding revenue and protecting your investment.

Why PPM matters

- Extends equipment lifespan
- Minimises costly breakdowns
- Maintains safety and compliance
- Improves customer satisfaction

TSG Maintenance Expertise

- Comprehensive emergency call-out options
- Highly trained technicians
- Extensive stock of spare parts for first-time fixes
- Regular training to maintain service excellence

Detergents and Chemicals

TSG supplies high-performance cleaning agents formulated for superior results and environmental protection. Options include Kärcher's own range and TSG's proprietary solutions.

Forecourt Lighting Be bright, stay safe

Lighting transforms forecourts into welcoming, secure destinations. A well-lit site attracts customers, boosts brand visibility, and enhances safety for staff and visitors. It also functions as a landmark, capturing attention from passing traffic and strengthening brand identity.

TSG designs and installs energy-efficient lighting schemes for canopies, stores and external areas, creating an inviting environment that boosts sales and strengthens customer confidence. Our solutions combine aesthetics with practicality, ensuring compliance with safety standards and reducing energy costs.

Lighting also plays a vital role in security. Bright, strategically placed lights deter criminal activity and help staff monitor the forecourt from inside the store. For customers, effective lighting creates a sense of safety and comfort, encouraging repeat visits and longer engagement with the site.

Regular cleaning and maintenance are crucial for preserving brightness and preventing deterioration.

TSG offers tailored packages to keep lighting systems in optimal condition, protecting your investment and maintaining site appeal.

Lighting solutions include:

- Canopy lighting
- Spotlights
- Security lighting
- In-store illumination

Care & Protect Clean. Revive. Thrive.

First impressions matter. A neglected forecourt can deter customers and damage brand perception. TSG's Care & Protect programme revitalises sites, restoring equipment and structures to their optimal condition. This proactive approach extends asset life, reduces unplanned downtime and safeguards reputation.

Care & Protect covers every visible and functional element of the forecourt, from canopy and fascia cleaning to dispenser maintenance and electric vehicle (EV) charger servicing. It includes signage restoration, lighting inspection and deep cleaning to remove grime, oil and algae.

Every contract begins with a detailed site survey to identify priorities and tailor the service to your needs. Forecourt owners can select the frequency and scope of works, creating a bespoke plan that fits their budget and operational goals.

Scope of Care & Protect

- Canopy and fascia cleaning
- Signage and branding maintenance
- Fuel dispenser and EV charger care
- Car wash servicing
- Lighting inspection and repair
- Forecourt deep cleans and surface treatments

With TSG, one trusted partner manages all inspections and remedial works, simplifying maintenance and controlling costs.

TSG UK Solutions

TSG delivers integrated solutions that support the design, delivery and operation of modern energy and transport infrastructure. From electric vehicle charging and sustainable fleet depots to multi energy refuelling, solar PV, battery storage and high voltage connections, TSG provides scalable systems built to meet today's demands and evolve for the future. Our expertise spans forecourts, convenience retail and commercial sites, combining smart payment and control technologies with engineering, installation and ongoing service and maintenance support. Covering everything from energy generation and distribution to fuel, car wash and site optimisation, TSG enables businesses to operate efficiently, securely and with confidence across an increasingly complex energy landscape.
